WORK EXPERIENCE

Trantor Software Pvt Ltd.

Chandigarh, India | Aug 2022 - Present

- Worked in the project which is global SaaS leader of Integrated Risk Management (IRM) and Governance, Risk, and Compliance (GRC) solutions.
- The client's web app was built on backbone JS and we migrated it to Next JS.
- Designed the architecture of various functionalities and developed their functional components in NextJS framework using ReactJS, JavaScript, mirage, SWR, CSS3, Material-UI, Context.
- Created test cases and optimized various functionalities for better performance using latest optimization techniques.

INFOSYS LTD

Pune, India | Oct 2019 - July 2022

- Worked in the project which is one of the leading DTH broadcasting service providers in America.
- Structured and developed feature rich front end, while also ensuring that all the requirements are met with appropriate coding standards and company policies are followed.
- Put forth new ideas which were appreciated and implemented as well.
- Collaborated with the team in agile methodology to design, structure and implement new web app components for client.
- Worked on latest React JS Functional Components, Hooks, Forms, Events, Router, ES6 and Redux.
- Carried out quality assurance tests to discover error and optimize performance.

INFOSYS INTERNSHIP

Mysore, India | Feb 2019 - April 2019

- Learnt Python Programming including OOP concepts and basic data structures.
- Learnt C# and the MVC architecture. Created multiple C# applications following the principle of MVC architecture
- Developed front end for web scrapping project. Scrapped out of OXL website, the website was developed on ASP.NET in which end user was able to select the product want to buy and filter the search result based on his preferences

PERSONAL PROJECTS

Data Filtering website

- <https://filytery.netlify.app/>
- Built 1 data filtering site which can filter and suggest restaurants and places which user can visit.
- Filtering can be done on the basis of category, price, cuisines and star rating of that area.
- Site is responsive and optimization techniques are used such as debouncing.

Others

- Image search app -> <https://ashishaswal02.github.io/search-gallery/>
- Color shades generating app -> <https://shades-generator-at.netlify.app/>
- Order menu app -> <https://menu-at.netlify.app/>

EDUCATION

Graphic Era Hill University, Dehradun

Bachelor in Technology in Computer Science Engineering | 2015- 2019
